

February 15, 2019

Dear Colleague,

Together, Crest + Oral-B and ODHA are offering a powerful ½ day of professional development. Join us for an in-depth review of the new American Academy of Periodontology (AAP) periodontal classifications, how they guide our treatment recommendations, and what other factors influence client treatment outcomes.

Kerry Lepicek will lead the presentation and help you understand and navigate your way through the new staging and grading guidelines for periodontal disease.

We invite you to join us on:

Friday, April 5, 2019, from 8:00 a.m. to 12:00 p.m.
Mississauga Convention Centre
75 Derry Road West, Mississauga, Ontario L5W 1G3
Tel: (905) 564-1920
Free Parking

Participants will receive the following:

- Full hot breakfast and beverages
- A gift bag, including the new Crest + Oral-B Genius Power Toothbrush – with Bluetooth and Position Detection Technology AND samples of the latest innovation in dentifrice...PLUS special draw gifts! (You must attend to receive your gift)

Registration is \$49 (HST included) and will be accepted on a first come, first served basis. Registration is accepted until **March 28, 2019 or when the event is sold out.** Register by calling the ODHA at **1-800-315-6342, beginning Tuesday February 19th at 8:30 a.m.** Our events fill quickly and registration will not be accepted at the door so register today! Visa or MasterCard are accepted. Registration is non-refundable and non-transferable.

Check-in and breakfast begins at 8:00 a.m.

We are excited to offer this special event invitation to **ODHA members ONLY!** Hope you can join us!

Kind regards,

Robyn Shields
National Operations Manager
Crest + Oral-B

Executive Director
Ontario Dental Hygienists' Association

Course Description:

Join us for an in-depth review of the new periodontal classifications, how they guide our treatment recommendations, and what other factors influence client treatment outcomes. New oral systemic research is emerging and it is necessary to find new ways to motivate, educate and inspire our clients to improve their periodontal health. Dental hygienists are the initiators of this transformation. The new AAP periodontal classifications encourage us to expand our assessment strategies and explore the difference between biofilm and non-biofilm induced gingivitis. Kerry will help you understand the new staging and grading guidelines for periodontal disease. Using client cases, we will navigate and summarize the new periodontal classifications.

Learning Objectives:

1. Discuss the new AAP classification
2. Explain why we need to consider risk factors in disease classification
3. Increase your ability to identify the four new peri-implantitis classifications
4. Improve awareness of the significance of reviewing medical and family history before our clients receive oral care.
5. Understand how the classification guidelines can help with your Dental Hygiene Process of Care (ADPIE).

Kerry Lepicek, RDH is a highly focused and engaging presenter with over a decade of experience using an interceptive and preventive approach to treating periodontal disease, peri-implantitis, halitosis, and caries. Her focus is on educating her clients and the dental profession on health and wellness. She is a published author and has lectured locally and internationally, and has been featured in the Dental Hygiene Quarterly.
